

Biomop™

BIODEGRADABLE DUST MOP

The Biomop is an electrostatically charged mop that draws and locks in dust and dirt for green inspired cleaning programs. Independent testing shows that the Biomop sheet is twice as efficient as the leading brand sweeper sheet. Regular dusting improves indoor air quality and when the Biomop is used correctly, it can reduce cross-contamination in health care institutions because a “one-sheet-per-room” policy is easily implemented.

Unlike the leading brand sweeper sheets, the Biomop is an environmentally friendly product that can be safely disposed of in a landfill or added to compost. Each sheet will biodegrade to a tiny fraction of its original size within 6 weeks. Biomop’s biodegradability has been independently tested and proven in accordance with the ASTM D6400-99 standard.

The Biomop™ will degrade to a fraction of its original size within 6 weeks.

THE ENVIRONMENTAL ALTERNATIVE

The Biomop is an environmentally responsible 'dry' cleaning tool that provides solutions to many of your green cleaning strategies. Biomop is disposable and biodegradable, so it eliminates the need for costly laundering. What's more, it is effective in removing dust in a dry application, reducing the need for water and chemicals. Its lightweight design diminishes worker fatigue and the Kwik™ system handle with spring-clip frame can be adjusted to accommodate any person's height.

MOISTURE

Amount of moisture in the applicator required to effectively clean the surface.

SURFACE

Smooth - Uniform surfaces or lower levels of dirt.
Textured - Grouted tile or surfaces with a high level of dirt.

WHY YOU NEED THIS:

- Non-woven fabric sheets are disposable and biodegradable for companies implementing green initiatives programs.
- Economical to use every day or when laundry facilities are not available.
- Sheets are efficient to use because they pickup twice the amount of dirt as the leading national sweeper.
- Microscopic pickup similar to the advantages enjoyed by microfibre.

yarn technical data

fibre	synthetic biodegradable sheet
colour	blue
ply	non-woven
biodegradable	6 weeks: ASTM D6400-99
application	use dry only

This product is certified as Biodegradable by an independent third party laboratory under ASTM and DIN standards.

product	size [in]	material	description	pack
