

Ultrafibre cloths with the power of silver technology.

Ultrafibre Cloth

Our new self sanitizing range of ultrafibre cloths combines the cleaning power of microfibre with the antibacterial benefit of silver technology. The ultrafibre picks up dirt and bacteria from surfaces and the silver ions bound to the fibre prevents the growth of bacteria within the cloth. This simple and safe solution adds one more layer of protection against the spread of infectious diseases in the workplace.

The silver technology is permanent and the performance does not diminish over time.

CLEANING BY ZONES

Colour coding cleaning materials and equipment helps ensure products are not used in multiple areas, therefore reducing the risk of cross-contamination. For this reason, microfibre hand cloths used in person-contact-zones should be colour coded.

This colour scheme was adopted from the The National Patient Safety Agency (NPSA) National Colour Coding Scheme for cleaning materials. There is currently no single colour code scheme in use across North America.

MOISTURE

dry damp wet

Amount of moisture in the applicator required to effectively clean the surface.

SURFACE

smooth textured

Smooth - Uniform surfaces or lower levels of dirt.
Textured - Grouted tile or surfaces with a high level of dirt.

SAFE FOR PEOPLE AND THE ENVIRONMENT

This technology is EPA registered for a broad range of uses including food, water contact, and textiles. It is also listed under the FDA food contact substance notification for use in all types of food contact polymers in 21 CFR, Parts 174 through 186. USDA has also listed it for non-food compounds maintained by NSF for food processing plants.

Silver is regarded by the scientific community as part of a chemical free antibacterial strategy. The self-sanitizing cloth will not support the growth of a microbial population and will render single cell bacteria inert (99.9% reduction after 10-to-60 minutes of dwell time).

yarn technical data

fibres	ultra-microfibre w/ion silver
weave	super Millentex® (0.13 denier)
finish thread	100% polyester
size	30 x 38 cm
absorption	700%
laundry cycles	up to 500 @ 60°C
care	bleach not recommended

product	colour	size [cm]	description	pack
60372	green	30 x 38	super Millentex®	5
60370	red	30 x 38	super Millentex®	5
60371	yellow	30 x 38	super Millentex®	5
60373	blue	30 x 38	super Millentex®	5
