

The perfect problem solver when ultrafibre cloths are too fine to scrub.

## Handyscrub™

The Handyscrub™ is a small soft scrubber that is at home in the kitchen, down on the floor or in the washroom to remove stubborn dirt. It's the perfect problem solver and a welcome addition when ultrafibre hand cloths are too fine to scrub a soiled surface. The addition of silver technology provides antibacterial protection against cross-contamination.

This simple and safe solution adds one more layer of protection against the spread of infectious diseases in the workplace. The silver technology is permanent and the performance lasts the life of the Handyscrub™.

## SAFE FOR PEOPLE AND THE ENVIRONMENT

This technology is EPA registered for a broad range of uses including food, water contact, and textiles. It is also listed under the FDA food contact substance notification for use in all types of food contact polymers in 21 CFR, Parts 174 through 186. USDA has also listed it for non-food compounds maintained by NSF for food processing plants.

Silver is regarded by the scientific community as part of a chemical free antibacterial strategy. The self-sanitizing cloth will not support the growth of a microbial population and will render single cell bacteria inert (99.9% reduction after 10 to 60 minutes of dwell time).

## WHY YOU NEED THIS:

- Reduces the risk of cross-contamination because the Handyscrub™ “self-sanitizes”.
- Reduces the dependency on chemicals to sanitize the cloth.
- Bacteria and other unicellular microorganisms cannot live on the Handyscrub™ or produce foul odours.
- Save energy by reducing the laundry temperature because the Handyscrub™ has silver technology.

### MOISTURE

dry    damp    wet

Amount of moisture in the applicator required to effectively clean the surface.

### SURFACE

smooth    textured

Smooth - Uniform surfaces or lower levels of dirt.  
Textured - Grouted tile or surfaces with a high level of dirt.

### yarn technical data

pile	70% N/P microfibre (0.19 denier), 30% polypropylene
fabric type	warp knit, looped-twist
insert	polyester non-woven
laundry cycles	up to 500 @ 60°C
care	bleach not recommended

product	size [cm]	material	pack
60360	8 x 12	blue nylon/polyester microfibre with polypropylene scrubbers	5
60361	8 x 12	red nylon/polyester microfibre with polypropylene scrubbers	5
