

Silver technology lasts the life of the microfibre.

Finish Applicator

MICROFIBRE FLAT-MOP

This mop is designed to be used in a wet or saturated state and is an excellent choice for applying floor finishes or disinfectants. Our new AG Silver is known to provide naturally occurring antibacterial properties when single-cell organisms come in contact with moisture on the flat-mop.

Silver ions do not damage the environment and last the life of the microfibre. This technology also eliminates smells associated with bacterial growth when mops are left damp for extended periods.

LAYERS OF CONSTRUCTION

1. **Proprietary Millentex® Microfibre**
Twist-loop microfibre poly blend for quick release when applying chemicals.
2. **Millentex® Cloth**
Absorbs large amounts of solution and quickly discharges for floor finishing.
3. **Non-woven PET Textile**
Provides loft for cushioning when mopping.
4. **Non-woven Polypropylene**
Honeycomb waffle provides structural integrity.
5. **Z-Velcro™**
Proprietary polyester backing.
6. **Polyester Piping**
Used to lock layers into a cohesive structure.

APPLY WET IN SATURATED STATE

Designed to quickly absorb a solution and just as quickly release it so all the chemical is transferred to the floor. This mop is useful for applying disinfectants and floor finishes.

WHY YOU NEED THIS:

- Use this mop as an applicator. The mop quickly absorbs solution and releases it to leave the floor wet.
- Great for applying floor finishes or disinfectants.
- The AG Silver technology has natural antibacterial properties that add an extra level of protection against cross-contamination.

yarn technical data

pile	twist-loop: 40% Microfibre and 60% polyester
inserts	Millentex® + PET non-woven polypropylene non-woven
backing	100% Z-Velcro™, polyester
piping	poly tape
laundry	500 cycles @ 60°C 200 cycles w/bleach >10.7 pH.
